EDUCATION

VELLORE INSTITUTE OF TECHNOLOGY, VELLORE

Master of Computer Applications
Jul 2025 - Present
GPA: 9.23 / 10 (After Semester 1)
VITMEE Rank: AIR 23

INDIAN INSTITUTE OF TECHNOLOGY, GUWAHATI

Minor in Data Science
Jan 2025 - Present
Results Awaited

KRISTU JYOTI COLLEGE OF MANAGEMENT AND TECHNOLOGY, KERALA

Bachelor of Computer Applications
Aug 2018 - Apr 2021
GPA: 8.4 / 10

SKILLS

PROGRAMMING LANGUAGES:

JavaScript, TypeScript, Java, Python

FRONT-END DEVELOPMENT:

React.js, Redux, TailwindCSS, Material UI, Radix UI, HTML, CSS

BACK-END DEVELOPMENT:

NodeJS, Express

DATABASES:

MySQL, Oracle, MongoDB

CLOUD & INFRASTRUCTURE:

AWS, Nginx, Load Balancing, Linux Server Administration, Redis, BullMQ

AI / MACHINE LEARNING:

NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch

COMPUTER SCIENCE FUNDAMENTALS:

Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Operating Systems

NETWORKING & SECURITY:

FortiGate NGFW, FortiManager, FortiAnalyzer, Network Monitoring

TOOLS:

Git, Figma, Photoshop

EXPERIENCE

BROSCODE | Full Stack Developer (Freelance) | Apr 2024 - Present

- Designed and developed RESTful APIs using Node.js and Express for MERN applications, enabling scalable and high-performance backend services.
- Designed responsive React interfaces using TailwindCSS and Radix UI, improving UI consistency across multiple client applications.

TATA CONSULTANCY SERVICES | Front End Developer | Oct 2022 - Nov 2023

- Built responsive, high-performance user interfaces using React, improving UI consistency and load efficiency.
- Created reusable components with TailwindCSS and Radix UI, reducing development time across features.
- Collaborated with cross-functional teams to translate requirements into scalable front-end solutions.

TATA CONSULTANCY SERVICES | Network Administrator | Aug 2021-Oct 2022

- Configured and managed FortiGate NGFW, firewall policies, and routing to ensure secure network operations.
- Monitored enterprise network traffic and resolved infrastructure issues, maintaining high availability for internal systems.
- Performed firmware upgrades and security patching to maintain system reliability.

FREELANCE PROJECTS

[Hogar Foods](#) | E-Commerce Web Application

Built a full-stack e-commerce platform with customer and admin modules. Implemented product management, cart, checkout, and order tracking using Node.js, Express, React + TypeScript, and MySQL.

[Alanis Makeover Studio](#) | Website Revamp

Redesigned existing website with a modern UI, improved navigation, and responsive layout.

[Heavenly Bites](#) | Online Ordering Platform

Developed a dynamic product catalog with real-time pricing and an online purchase workflow for a home-based bakery business.

AI / ML PROJECT

HummingBird | AI-Powered Melody to Music Generation Platform

- Built an AI audio processing pipeline that converts hummed melodies into multi-instrument backing tracks using torchcrepe (PyTorch) for deep learning based pitch detection.
- Developed a symbolic music generation engine using pretty_midi to perform melody quantization, key/scale detection, and harmonic MIDI orchestration.
- Rendered MIDI to audio using FluidSynth SoundFont synthesis and integrated the AI service into a React + Node.js full-stack system with MongoDB storage.

CERTIFICATIONS & ACTIVITIES

Cisco Certified Network Associate 200-301

Fortinet Network Security Expert Level 3 : Certified Associate

Co-Founder | Infinity Music Band

Chief Financial Officer | Inovus Labs (IEDC)
