Education

Vellore Institute of Technology, Vellore **Jul 2025 – Present**
Master of Computer Applications | GPA: 9.13/10 (after Sem 2) | VITMEE AIR 23 *Vellore, Tamil Nadu*

Indian Institute of Technology, Guwahati **Jan 2025 – Present**
Minor in Data Science | Results Awaited *Guwahati, Assam*

Kristu Jyoti College of Management and Technology **Aug 2018 – Apr 2021**
Bachelor of Computer Applications | GPA: 8.40/10 *Changanacherry, Kerala*

Experience

Murugappa Group - Tube Products of India **Jul 2026 – Present**
Full Stack Developer Intern | React, TypeScript, Express, PostgreSQL, Socket.IO, Redis/BullMQ, MinIO, Docker, Nginx

Beacon: Real-Time Truck Visibility & Halting-Cost Platform

- Built a self-hosted PWA tracking trucks across 9 plants, aimed at about INR 4L/month in avoidable halting charges. It has an append-only audit trail, photo evidence and a versioned cost engine that locks charges at exit.
- Engineered offline-first submissions (IndexedDB queue and idempotency keys, verified under concurrent load), live Socket.IO boards and push notifications via BullMQ.

Tata Consultancy Services **Aug 2021 – Nov 2023**

Front End Developer | MySQL, Express, React, Node.js, Tailwind CSS, Redis, Radix UI

- Developed and maintained 2 responsive web applications using React.js, serving 10,000+ monthly active users across enterprise clients.
- Optimized application performance through code splitting and lazy loading, improving page load speed by 40% and achieving 90+ Lighthouse scores.

Network Administrator | FortiGate, FortiManager, FortiAnalyzer, ServiceNow

- Configured and maintained 50+ FortiGate firewall policies for an enterprise network supporting 2000+ employees.
- Reduced security incidents by 30% through proactive monitoring and timely patch management.

Projects

FamilyCare: Real-Time Family Medication Coordination Platform | *Node.js, Express, MySQL, Redis/BullMQ, Socket.IO, Docker, JWT*

- Built an event-driven microservices backend (Node.js, MySQL, Redis, Docker) for real-time family medication coordination, with an API gateway and 3 independent services.
- Prevented duplicate dose logging under concurrent writes using row-level locking in ACID transactions (exactly 1 of 5 simultaneous requests succeeds), and pushed live updates to family members over Redis Pub/Sub and Socket.IO.
- Built BullMQ cron jobs with retries for reminders and missed-dose detection, and cut OpenFDA lookup latency by ∼98% with Redis caching.

EventPass: QR-Based Event Attendance & Meal Verification System | *TypeScript, React, Tailwind CSS, Node.js, Express, PostgreSQL, JWT, Zod, Resend*

- Built a full-stack monorepo app where hosts bulk-import guests from CSV/Excel, email secure QR invitations, and track check-ins and meals live through a browser-based scanner using the native BarcodeDetector API.
- Added RBAC for Super Admin, Client and Scanner roles with JWT access/refresh tokens, per-event ownership checks and admin approval before QR generation, block duplicate check-ins and repeat meal claims; hardened with Helmet, rate limiting and SHA-256 hashed QR tokens, containerised with Docker Compose.

Hogar Foods (Freelance): E-Commerce Web Application | *React, TypeScript, Node.js, Express, PostgreSQL, Zod*

- Built a full-stack e-commerce platform with customer and admin modules, featuring product management, cart, checkout, and order tracking, handling 50+ monthly orders with zero reported downtime.

Technical Skills & Certifications

Languages: TypeScript, JavaScript, Java, Python, SQL, HTML/CSS
Frontend: React.js, Redux, TailwindCSS, Radix UI, PWA
Backend: Node.js, Express, REST APIs, JWT, Socket.IO, BullMQ, Zod, Microservices
Databases: PostgreSQL, MySQL, Oracle, MongoDB, Redis, ORM
Cloud & DevOps: AWS (EC2, S3), Docker, Nginx, Load Balancing, MinIO, Linux, Git
Certifications: Cisco Certified Network Associate (CCNA 200-301)
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Computer Networks
